

Alley Weigh™

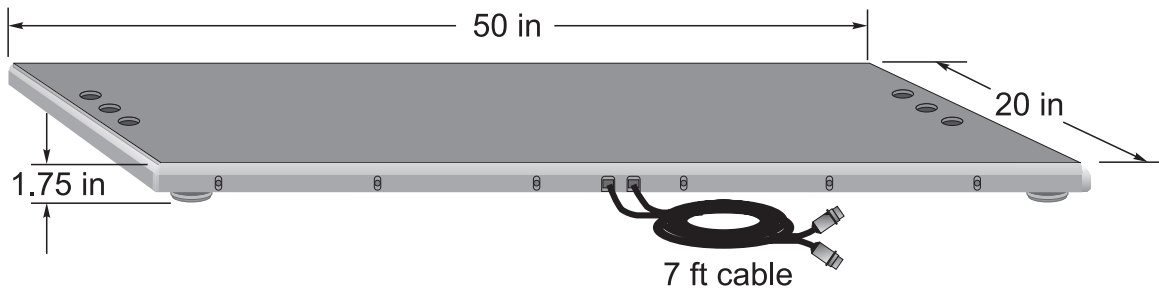

The portable Alley Weigh is an economical solution to the growing need for accurate and reliable electronic weighing on the farm.

- ***Nonskid surface***
- ***Floor hugging design***
- ***Portable***
- ***Versatile***

The indicator's unique, adjustable filtering provides accurate, stable readings despite animal movement.

A better weigh to measure livestock performance!

Features and benefits

Versatile—The Alley Weigh accomplishes a multitude of weighing jobs on the farm. It fits easily into alleyways for weighing market hogs, nursery pigs, or other livestock. Its low profile makes it easy to weigh feed carts and bulk containers. The non-skid surface protects you and your livestock from accidental slips and falls. The adjustable foot pads allow it to work effectively on uneven floors.

Portable—The Alley Weigh is easy to move, weighing only 55 pounds. You can set it in place without ramps or recessed floors because it's only 1.75 inches high.

Economical—The Alley Weigh has no installation costs. And its patented Weigh Bar® system means there are no moving parts that require maintenance or adjustment.

Accurate—The Alley Weigh gives you consistent accuracy, within 0.5%, and it's compatible with a number of Weigh-Tronix indicators for fast digital readout.

Dependable—The Alley Weigh is built by Weigh-Tronix, a maker of quality electronic scales for over 30 years.

Options

- Weigh Bars only or Weigh Bars with convenient mounting brackets.
- Your choice of indicators

Specifications

Capacity: 1000 pounds

Overall height: 1.75"

Accuracy: 0.5%

Deck dimensions: 20" x 50" x 1.25"

Deck material: Carbon steel

Deck finish: Textured epoxy

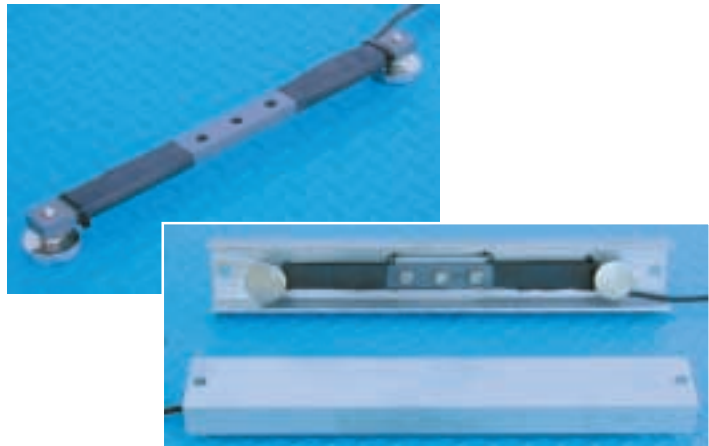

Weight: 55 lb

Adjustable footpads

Weigh Bar dimensions: 16" L x 1" W x 0.5" H

Weigh Bar bracket dimensions: 20" L x 3" W x 1.5" H

Warranty: One year on deck, three years on indicator

Model 615 and 615XL Indicators

Model 915A Indicator
