

NEW FOR 2012

***Scale Option
for John Deere DN345 Fertilizer and Lime Spreaders***

The DN345 Spreaders are manufactured scale-ready, with no modification or welding required.

Benefits of utilizing this scale option include:

- **Determine pounds of fertilizer used per acre**
- **Determine pounds of fertilizer used per farm**
- **Know inventory of fertilizer at all times at 99.5% accuracy**
- **The capacity of the scale system is 99,000 pounds**
- **Durable enough to withstand rapid application and rough ground**
- **Optional indicator upgrade, allowing easy transfer of data to computer**

The John Deere DN345 Fertilizer Spreader scale kit includes six load cells, wiring, mounting brackets, and a water resistant, back-lit readout. The installation time is 8 hours, and has NO welding and NO drilling involved.

Scale-Tec also offers kits for other Fertilizer Spreaders.
